MONROE COUNTY

CPO Schachner received a complaint on his day off regarding fishing without permission a closed access lake. He quickly responded and located three young men fishing from an unregistered paddleboat without any lifejackets, and one of the subjects did not have a fishing license. It was determined the three subjects actually had permission. After they agreed to immediately obtain lifejackets and the fishing license, the subjects were issued a total of 6 warnings.

RANDOLPH COUNTY

CPO Schachner and CPO Liebl were patrolling Kaskaskia River and encountered a boat in need of assistance. The boat had serious motor issues in which the occupants could not shut the motor off nor prevent it from revving at extremely high rpms. Flipping the engine kill switch did not stop it, but one of the quick-thinking passengers pulled the fuel line, which stopped the motor quickly. The officers towed the boat and four occupants a short distance to the nearby boat ramp.

ST. CLAIR COUNTY

District 13 has received numerous complaints of over-sized motors on 10hp restricted waters. CPO Schachner covertly worked Peabody River King and witnessed multiple violations. CPO Sievers assisted in apprehending the violators at the boat ramp, and they issued 2 citations for operation of over-sized motors and multiple written warnings.

CPO Schachner and CPO Sievers were patrolling the Kaskaskia River when they received a call for assistance. A recreational boat had "spun" a prop which prevented the boat from operating forward or backward. The officers towed the boat and two occupants upstream to the nearest boat ramp and then transported the occupants back to their vehicle which was located at a different ramp. One subject recognized CPO Sievers and recalled that she was a passenger on a different boat several years prior when CPO Sievers also assisted them with towing/transporting that disabled boat.

CPO Liebl was enroute to a boat patrol when he observed a vehicle drive through a red light on Rt. 15. A traffic stop was conducted, and it was found that the driver had a suspended driver's license. He also had expired registration and improper registration stickers on the vehicle. Citations were issued, and the man was given a mandatory court date.

CPO Liebl was asked to join Team Watters Sonar Search and Recovery in searching for a missing woman and her vehicle. The woman had been missing since late April. While using sonar to search the lakes at Frank Holten State Park, an object was discovered that appeared to be a vehicle. With the help of the Hillsboro, IL

Fire Department dive team, the vehicle was determined to be that of the missing woman. The dive team helped hook up the vehicle so it could be removed from the lake. Once on land, it was discovered that the missing woman was inside the vehicle. Illinois State Police and East St. Louis Police are handling the investigation. Without the use of sonar and the assistance of Team Watters Sonar Search and Recovery, it is unknown how long the woman and her vehicle would have remained missing.
